ABC-TV evening news 12/19/69 showed Clay Shaw as garrison as led-in, channel 7. Channel 4 at 6 pm announced review of "JFK" by truly Campbell. Both made no further mention until late. Switch from time to time to station & NBC on ch 2, no mention after yesterdays preview. Was last item on 6 stations. NBC - a Ph flow demonstration, not faith but in all - "fascinating" - "typical clear story movie." If ABC had anything it had to be so very brief I missed it in switching stations.

Night line opens with garrison making confidentiality statements, me, me, me, lost me on wide compliance Bill Blakely and Alison,

It goes into evidence - single bullet theory - about which I was not asked any thing

Robert O should also use. It begins with "the other side."

Stone says files not released, won't be until 2029

Stone says "research community" "beliefs might say unfavorable

Stone says "research community" "beliefs might say unfavorable complex behind assassination. stones arguments is that these people had the motive & that this includes FBI & Secret Service

Agent Sawyer vice Tid Zapple

Denis use of garrison - "I admire Jim garrison" - "I don't think he had a fair chance" - uses term as a "metaphor" He cites 9 factors as proof as of Shaw's "perjury" Sawyer says he had trouble knowing when stone represented fact and did not. argues again "see the files out" first those of Horse, Then CIA / FBI. Stone never addressed any thing directly. And this is the whole thing - one little bit of the story

Mostly Stone allowed to testify by himself

He is allowed to represent that files that are discussed
